Notice of Allowability

Application/Control Number: 10/790,911

Art Unit: 2618

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's representative, William Hilton, on 9/26/07.

- 2. The application has been amended as follows:
 - in claim 1, line 15, after "output signal from", add ---a difference between-----;
- in claim 1, line 15, after "power signal", add -----the output of said track and hold circuit-----;
 - in claim 15, line 15, after "feedback signal from", add ---a difference between---;
- in claim 15, line 15, after "said reference signal", add ----the output of said track and hold circuit-----.

REASON FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 15, the closest prior art, Davidson discloses a radio frequency output power control system for use in communication systems that use a modulation scheme having a non-constant amplitude envelope, said power control system comprising: a power amplifier having a power amplifier input for receiving an input signal with a non-constant amplitude envelope, a power control input

Application/Control Number: 10/790,911

Art Unit: 2618

for receiving a power control signal, and a power amplifier output for providing an amplified output signal; a track and hold circuit for tracking a measured reference power signal that is representative of a modulation of the input signal; and subtraction means for subtracting an output of said track and hold circuit from said measured reference power signal that is representative of the modulation of the input signal.

However, the cited prior art fail to disclose or suggest:

subtracting a feedback signal that is representative of a modulation of the amplifier output signal from a difference between said measured reference power signal and the output of said track and hold circuit to provide a power control signal that is coupled to the power control input, such that said power control signal is responsive to the feedback signal, the output of said track and hold circuit, and the measured reference power signal.

Regarding independent claim 12, it is allowable for the same reason as in the previous office action filed 5/01/07.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/790,911

Art Unit: 2618

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lana N. Le whose telephone number is (571) 272-7891. The examiner can normally be reached on M-F 9:30-18:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward F. Urban can be reached on (571) 272-7899. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
